Rogue Valley Metropolitan Planning Organization Air Quality Conformity Determination for 2021-2024 Transportation Improvement Program

Draft August, 2020

Published by:

Rogue Valley Council of Governments 155 N. First St. Central Point, OR 97502 541.664.6674 www.rvcog.org and www.rvmpo.org

This report was financed in part by the Oregon Department of Transportation, the Federal Highway Administration and the Federal Transit Administration. **Page left intentionally blank**

Synopsis

An Air Quality Conformity Determination (AQCD) for a plan and program is a finding that the plan and program conform to appropriate air quality requirements.

This AQCD shows that with the implementation of the Rogue Valley Metropolitan Planning Organization (RVMPO) 2021-2024 Transportation Improvement Program, current federal and state on-road air quality requirements will continue to be met in the Medford carbon monoxide (CO) and Medford-Ashland particulate matter (PM₁₀) Air Quality Maintenance Areas.

The CO and PM_{10} Air Quality Maintenance Areas (AQMA) are two distinct maintenance areas with different boundaries. The CO AQMA encompasses the City of Medford's Urban Growth Boundary (UGB). The Medford-Ashland PM_{10} AQMA covers about 228 square miles and approximates the Bear Creek Basin. The area is generally described as the Rogue Valley.

For the Medford CO maintenance area, all non-exempt projects in the 2021-24 Transportation Improvement Program within the Medford Urban Growth Boundary (UGB) were reviewed under the interagency consultation process. Each of the projects was found to be <u>not regionally</u> <u>significant</u> based on screening criteria for regional significance established by the RVMPO in accordance with the Transportation Conformity Rule (40 CFR 93). Therefore, the RVMPO is relying on the previous emissions analysis (per 40 CFR 93.122(g)(2)(i) and including estimated vehicle miles traveled (VMT) for the projects, in accordance with 40 CFR 93.122(a)(1)).

The purpose of this document

An AQCD is required whenever the Regional Transportation Plan (RTP) or Transportation Improvement Program (TIP) is updated, or every four years, whichever comes first. The U.S. Department of Transportation (USDOT) conformed the current RTP Jun2 12, 2017. USDOT must make the conformity determination before the plan and program can go into effect.

In the Rogue Valley Metropolitan Planning Organization area, the conformity document must show that through the horizon of the plan and program air quality requirements for CO and PM_{10} will be met. Specifically:

Carbon Monoxide—The area encompassed by the Medford urban growth boundary (UGB) was re-designated from nonattainment to attainment by the U.S. Environmental Protection Agency (EPA) in 2002. As summarized above, none of the non-exempt projects in the Medford UGB were found to be regionally significant for CO. Thus, the plan and program conform for CO without requiring a new regional emissions analysis, although estimates of vehicle miles traveled (VMT) for these projects must be provided in conjunction with this finding.

 PM_{10} —The area within the Medford-Ashland Air Quality Maintenance Area, which is entirely within the RVMPO planning area, was re-designated from nonattainment to attainment by EPA in 2006, and the emissions budget shown above for PM_{10} from transportation (mobile) sources was deemed adequate to maintain air quality. Although the boundaries of the two maintenance areas are different and the pollutants are different, the process for showing conformity is similar. Analysis by the RVMPO found that through the horizon of the RTP (2038) and the TIP (2018), and in intervening years, PM_{10} and CO emissions from transportation will not exceed emission budgets, as shown in the tables above.

Actions to be taken

The RVMPO Policy Committee, as the policy board for the federally designated Metropolitan Planning Organization in the urbanized area that includes the cities of Ashland, Talent, Phoenix, Jacksonville, Medford, Central Point, Eagle Point, Jackson County, Rogue Valley Transportation District (RVTD) and the Oregon Department of Transportation (ODOT), must formally adopt the findings described in this report. Then USDOT and the federal Environmental Protection Agency confer on the analysis. Ultimately, USDOT will make a conformity determination based on this document. At that time, the RVMPO's 2021-2024 TIP will go into effect, as will any necessary amendments to the 2017-2042 RTP.

Details of the Air Quality Conformity Determination

This report shows that with the implementation of the 2021-24 TIP, all current federal and state requirements for on-road transportation emissions within the planning area will be met. For the entire Medford-Ashland Air Quality Maintenance Area, an area within the RVMPO planning area, PM_{10} emissions from on-road transportation will not exceed the budget set by ODEQ and approved by EPA in 2006. This means that transportation projects will not impede the area in continuing to meet air quality requirements.

The report also describes the finding that the 2021-24 TIP includes no non-exempt projects within the Medford Urban Growth Boundary CO planning area that are regionally significant. The implication of this finding is that the TIP/RTP conform for CO without the need for a regional CO emissions analysis.

In addition to the analysis itself, this report details how required consultation among appropriate agencies and organizations and the public occurred.

Resolution Number 2020 - XX Rogue Valley Metropolitan Planning Organization - Policy Committee Adoption of Air Quality Conformity Determination for the RVMPO 2021-2024 Transportation Improvement Program

Whereas, the Rogue Valley Council of Governments (RVCOG) has been designated by the State of Oregon as the Metropolitan Planning Organization (MPO) for the greater Medford Urban Area; and

Whereas, the RVCOG has delegated responsibility for MPO policy functions to the RVMPO Policy Committee, a committee of elected officials from Ashland, Eagle Point, Central Point, Jacksonville, Medford, Phoenix, Talent, White City, Jackson County, the Rogue Valley Transportation District and the Oregon Department of Transportation; and

Whereas, a project identification and selection process was carried out through the development of the 2021-2024 Transportation Improvement Program (TIP); and

Whereas, a public involvement process was developed and implemented consistent with the RVMPO Public Participation Plan throughout the development of the TIP and Air Quality Conformity Determination (AQCD); and

Whereas, the MPO, as required by law, held a 30-day public comment period to secure input and comment on the proposed conformity determination and the comments received were explicitly considered; and

Whereas, the 2021-2024 TIP has been shown through this document to meet state and federal air quality requirements; and

Whereas, the demonstration of air quality conformity was determined based on inter-agency consultation; and

Whereas, the improvements contained in the 2021-2024 TIP demonstrate financial constraint;

NOW THEREFORE, the Metropolitan Planning Organization Policy Committee approves and adopts the attached Air Quality Conformity Determination for the Transportation Improvement Program.

Adopted by the Rogue Valley Metropolitan Planning Organization Policy Committee on this XXth day of September 2020.

Jim Lewis, MPO Policy Committee Chair

1.0 OVERVIEW

This document is prepared by the Rogue Valley Metropolitan Planning Organization to demonstrate conformity of the 2021-2024 Transportation Improvement Program with the Clean Air Act, as required by federal and state requirements as set forth in 40 CFR 93.102(a)(1) and OAR 340-252-0010.

Federal air quality conformity requirements are described in 40 CFR Part 93. Oregon's Conformity State Implementation Plan (SIP), adopted by the Oregon Environmental Quality Commission (EQC) and approved by EPA, establishes rules and standards for determining air quality conformity of transportation plans, programs and projects within Oregon (OAR 340 Division 252). This conformity determination meets all federal and state conformity requirements.

1.1 Document Organizational Structure

This document is organized into three main sections. Section 1 provides a general overview of the document purpose. Section 2 lists the critical legislative requirements that must be met through this conformity determination, and shows how the RVMPO emissions analysis process meets requirements. This section includes details about analysis results. Section 3 summarizes the analysis demonstrating that the amended 2038 RTP and the 2018 TIP are within emission budgets for area pollutants.

1.2 Changes Since Last Conformity Determination

USDOT approved the conformity for the RVMPO 2042 plan and the 2018-21 TIP on June 12, 2017 (notification in Appendix B). A new conformity determination is necessary for adoption of the 2021-24 TIP.

1.3 Status of Air Pollutants

The U.S. Environmental Protection Agency (EPA) has established health-based National Ambient Air Quality Standards (NAAQS) for six air pollutants: carbon monoxide (CO), particulate matter (PM_{10} and $PM_{2.5}$), ozone (O3), sulfur dioxide (SO2), nitrogen dioxide (NO2) and lead (Pb). Areas that fail to meet the standards are designated "non-attainment" and are required to develop plans to come into compliance with the standards. Once compliance is achieved, a maintenance plan is developed to ensure that air quality will not be compromised in the future. Plans are approved by EPA and then included in the State Implementation Plan (SIP).

The SIPs include measures to regulate emissions from non-mobile, or non-transportation related area sources and point sources. EPA defines an area source as a stationary source that emits less than 10 tons per year of a single hazardous air pollutant (HAP) or 25 tons per year of all HAPs combined. EPA defines a point source as stack, vent, duct, pipe or other confined air stream from which chemicals may be released to the air. Area and point sources are not addressed in this AQCD; this document demonstrates transportation conformity only.

The Medford Urban Growth Boundary (UGB) is a maintenance area for carbon monoxide (Medford CO maintenance area) and the Medford-Ashland Air Quality Maintenance Area is a maintenance area for particulate matter of less than 10 microns (PM_{10}). See Figure 1on page 4 for more detail. Air quality for all other criteria pollutants meets the NAAQS and demonstration of conformity for these pollutants is not required. Rogue Valley Council of Governments (RVCOG) is the responsible agency for CO and PM_{10} conformity for state purposes.

Status of CO

EPA approved the Medford CO maintenance plan (State Implementation Plan or SIP), with a daily transportation emissions budget effective Sept. 23, 2002. Formal notice of approval is in Appendix A. The boundary of the Medford CO maintenance area is the Medford Urban Growth Boundary, as shown on Figure 1. The CO SIP also mandates a motor vehicle Inspection and Maintenance (I&M) program covering the entire Medford-Ashland Air Quality Maintenance Area (AQMA). All gasoline-powered motor vehicles registered to owners living within the Medford-Ashland AQMA must have vehicle emissions and on-board diagnostic systems tested biennially. Credits for this program are taken in the emissions factor calculation process described in section 2.3.

There has not been a violation of the CO NAAQS in the maintenance area since 1991. While these data show that CO levels are in compliance with the NAAQS, demonstration of conformity relies upon compliance with the federal and state conformity regulations.

Status of PM₁₀

EPA approved the PM_{10} maintenance plan (State Implementation Plan or SIP) for the Medford-Ashland AQMA effective Aug. 18, 2006. Formal notice of approval is in Appendix A. The plan establishes an annual transportation emissions budget. The Medford-Ashland $PM_{10}AQMA$ is shown on Figure 1.

There have been no violations of the NAAQS for PM_{10} since 1993. As with CO conformity, demonstration of PM_{10} conformity relies on compliance with federal and state conformity regulations.

1.4 Purpose of this Determination

The RVMPO 2021-2024 TIP as the short-range implementing program for projects in the Medford Urbanized Area. Federal and state regulations require these plans to demonstrate conformity to the State Implementation Plan. These regulations provide the basis for the RVMPO's issuance of a determination that projects in the 2021-2024 TIP comply with the SIP as required by the Clean Air Act Amendments of 1990, codified in federal statute under 40 CFR Part 93, as amended January 2008, and state statute under OAR 340 Division 252.

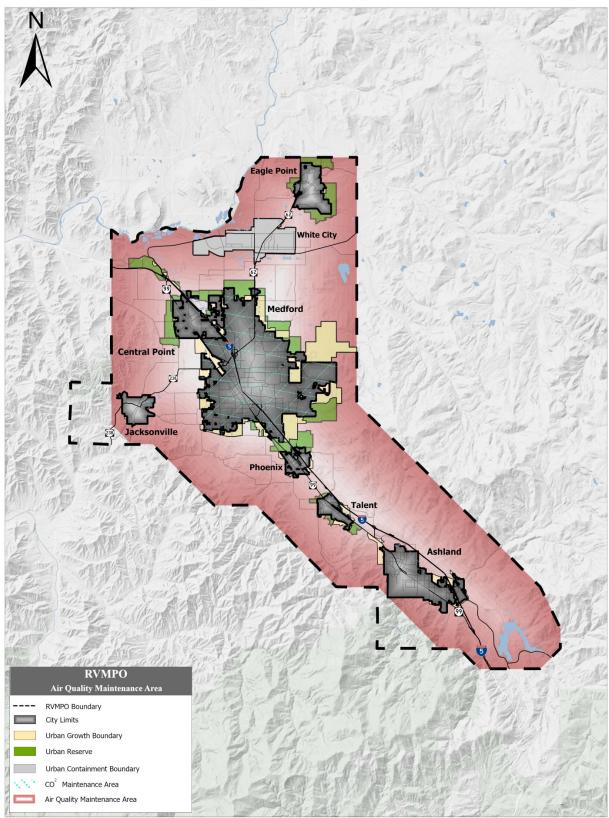

1.5 Structure and Authority of the RVMPO and RVCOG

The Governor of Oregon designated the Rogue Valley Council of Governments (RVCOG) as the Rogue Valley Metropolitan Planning Organization (RVMPO) on July 27, 1982. The RVCOG

Board of Directors delegated responsibility for RVMPO policy functions to the RVMPO Policy Committee, a committee of elected and appointed officials from Ashland, Talent, Jacksonville, Central Point, Medford, Phoenix, Eagle Point, Jackson County, the Oregon Department of Transportation, and the Rogue Valley Transportation District. As such, the RVMPO Policy Committee is responsible for ensuring that the region's transportation planning process is conducted in accordance with federal transportation planning regulations (23 CFR 450). In addition, transportation planning must be consistent with the Oregon Transportation Planning Rule (OAR 660, Division 12), the Oregon Transportation Plan and local plans. The RVMPO is responsible for preparing the regional long range transportation plan, the RTP, (23 CFR 450-322) and the short-range improvement program, the TIP, (23 CFR 450-322), and for making conformity determinations for those documents. RVCOG provides staffing to the RVMPO to fulfill RVMPO obligations. RVCOG provides opportunities for public participation in all RVMPO functions, prepares plans and programs, air quality conformity analysis and documents and partners with ODOT's Transportation Planning and Analysis Unit (TPAU) to develop and maintain the region's travel demand model, which is used to estimate vehicle miles traveled (VMT) for air quality conformity.

In addition to the Policy Committee, which is the decision making body for the RVMPO, there are two RVMPO advisory committees: the Technical Advisory Committee (TAC), made up of planning and public work staff of all RVMPO members, U.S. Department of Transportation (USDOT), Oregon Department of Land Conservation and Development (DLCD), Oregon Department of Environmental Quality (ODEQ) and the Oregon Department of Transportation (ODOT) ; and the Public Advisory Council (PAC) made up of citizens from all of the RVMPO geographic areas and interest areas (transit, and minority and low-income communities). Committees meet monthly and bimonthly respectively to review and make recommendations on matters going before the Policy Committee. The TAC is specifically designated under OAR 340-252-0060(2)(b)(A)(iv) as the standing committee for purposes of consultation for air quality planning.

2.0 DEMONSTRATION OF CONFORMITY FOR CO & PM₁₀

This section addresses state and federal requirements for both the Medford CO conformity determination and the Medford-Ashland AQMA PM_{10} conformity determination, and describes how those requirements have been fulfilled. The analysis for determining conformity is described in this section.

State rules on transportation conformity are contained in Oregon Administrative Rules (OAR), section 340-252; Federal rules are contained in section 40 Code of Federal Regulations (CFR) section 93.

2.1 General Requirements

Frequency of Conformity Determinations 40 CFR 93.104

The most recent conformity determination on the Rogue Valley RVMPO's RTP and TIP was June 12, 2017 (see Appendix B). Conformity of the RTP and TIP must be determined no less frequently than every four years or when there is an amendment (40 CFR 93.104). Because there is a new TIP it must be shown to conform with the SIP before it can be adopted by the RVMPO.

Consultation OAR 340-252-0060 40 CFR 93.105

Federal, state and local interagency consultation is required before making a conformity determination. Additionally, activities described in the RVMPO Public Participation Plan must be followed, as specified in 40 CFR 93.105, 40 CFR 93.112 and 23 CFR Part 450.

The RVMPO is the lead agency responsible for making the conformity determination for the RTP and TIP. The RVMPO Technical Advisory Committee (TAC), described in section 1.5, is the standing committee for the purposes of consultation on air quality under OAR 340-252-0060(2)(b)(A)(iv). TAC meetings are open to the public and are advertised by both e-mails to interested parties and web postings.

The RVMPO initiated interagency consultation April 9, 2020 by holding a discussion regarding the proposed CMAQ projects for the TIP. An additional meeting was held on ZOOM on August 24th to discuss Air Quality Conformity Determinations, and the city of Medford's BUILD project along Foothills Road.

Opportunities for public review and comment began in August with publication of the listing of projects and their assumed status as either non-exempt or exempt or having been identified as carried-over from a previous conforming TIP on RVMPO web site, <u>www.rvmpo.org</u>, and discussion at the September 9th RVMPO TAC meeting. Other opportunities included advertised

public meetings of RVMPO committees. The formal public comment period, from August 28, 2020 to September 29, 2020 including the RVMPO Policy Committee public hearing at its September 29th meeting were advertised at committee meetings and on the RVMPO's website. All meetings and hearings were held on ZOOM and were open to the public either through ZOOM or via telephone.

Additionally, prior to beginning conformity process, RVMPO engaged the RVMPO Committees and the public in allocating federal Surface Transportation Program (STP) and Congestion Mitigation and Air Quality Program (CMAQ) funds for 2022, 2023 and 2024 projects. The process concluded with a Policy Committee public hearing and adoption of the 2021-24 TIP and in June of 2020.

Table 1: Interagency Consultation Group Roster

 Table 2: Summary Schedule of Public Outreach and Consultation

 (To be completed/inserted once consultation and outreach is completed)

Content of Transportation Plans 40 CFR 93.106

The 2017-2042 RTP, adopted by the RVMPO Policy Committee in March 2017, contains updated forecasts for employment, population and land use projections. All assumptions are based on the acknowledged comprehensive plans of RVMPO member jurisdictions, including the region's very-long-range (50+ years) Regional Problem Solving Plan, which identifies areas of urban expansion beyond existing Comprehensive Plans. Land use designations in these plans were assumed to be in place through the forecast period. (However, under OAR 660-012-0016(1), adoption of a regional transportation plan by an MPO is not a land use decision under Oregon law. Additionally, an air quality determination does not trigger a need for a finding that the RTP is consistent with comprehensive plans.)

The highway and transit projects described the RTP are divided into "financially constrained" and "illustrative" implementation categories. Financially constrained projects are organized by phases of short (2017-21), medium (2020-30) and long (2031-42). All projects are sufficiently identified by design concept, scope, and location to ensure adequate modeling for conformity purposes.

Fiscal Constraint for Transportation Plans and TIPs 40 CFR 93.108

Transportation plans and TIPs must be fiscally constrained consistent with metropolitan planning regulations at 23 CFR Part 450 in order to be found in conformity. Table 2 provides a summary of the TIP financial analyses and demonstrates financial constraint. Appendix E contains the lists of 2021-24 TIP projects and a map illustrating project locations. Consistent with 28 CFR Part 450, all cost and revenue estimates in the plan and program are based on year of expenditure

dollars, reflecting estimated inflation rates developed by RVMPO and ODOT. Transit cost calculations were developed in consultation with RVTD.

Statement of Financial Constraint: Each project included in the financially constrained list of the RVMPO 2017-42 RTP and programmed in the FFY 2021-2024 TIP has an identified funding source or combination of sources reasonably expected to be available over the planning period. Project costs are adjusted for inflation to the year of implementation.

2.2 Criteria and Procedures for Determining Conformity

General

OAR 340-252-0010 40 CFR 93.109

To demonstrate conformity of a transportation plan and TIP, specific criteria listed in OAR 340 Division 252 and 40 CFR 93.110 through 93.118 must be addressed. These criteria include using the latest planning assumptions and the latest emissions model, and undertaking interagency consultation and public involvement. Responses to these specific criteria are in the following sections.

The RVMPO area includes two maintenance areas. The CO and PM_{10} Air Quality Maintenance Areas (AQMA) are two distinct maintenance areas with different boundaries. The CO AQMA encompasses the City of Medford's Urban Growth Boundary (UGB). The Medford-Ashland PM_{10} AQMA covers about 228 square miles and approximates the Bear Creek Basin. The area is generally described as the Rogue Valley. CO and PM_{10} maintenance plans (State Implementation Plans, SIPs) were approved by EPA on Sept. 23, 2002, and Aug. 18, 2006, respectively. Because the maintenance plans established emissions budgets for each area, the conformity test applied in both cases is the motor vehicle budget test as specified in 40 CFR 93.118.

Latest Planning Assumptions 40 CFR 93.110

The existing 2017-42 RTP was developed utilizing the most recent planning assumptions in force at the time the conformity analysis was undertaken in 2016. The 2017-42 RTP as well as the 2018-21 Transportation Improvement Program were found to meet Air Quality Conformity requirements and the AQCD was approved by the FHWA/EPA in June of 2017.

Consultation OAR 340-252-0060 40 CFR 93.112 See responses to OAR 340-252-0060 and 40 CFR 93.105 above.

Timely Implementation of Transportation Control Measures (TCMs) 40 CFR 93.113

The PM_{10} maintenance plan list street cleaning programs for the City of Medford, White City and the connecting transportation corridor (Hwy. 62). This street cleaning program is considered by ODEQ to be a Transportation Control Measure (TCM) for reducing particulate pollution. At a minimum, the cleaning program must use high-efficiency, vacuum street sweeper(s) or the equivalent over a geographic area that includes Medford, White City and the section of Hwy. 62, at a frequency of at least two times a month. Jackson County and Medford have fulfilled this obligation. Those jurisdictions and others in the RVMPO area typically use Congestion Mitigation and Air Quality funds to update street-cleaning equipment (see TIP and RTP project lists in Appendix E).

Currently Conforming Transportation Plan and TIP 40 CFR 93.114

The current 2017-42 RTP was adopted on March 28, 2017 and conformed on June 12, 2017 along with the 2018-21TIP.

3.0 Summary

The finding of this conformity determination is that the projects programmed in the 2021-2024 TIP will result in no increase in CO and PM_{10} emissions over the previously adopted 2017-42 RTP and 2018-21 TIP. Therefore, the TIP and complies with specific requirements of the federal Clean Air Act and Oregon State Conformity Rule, OAR 340-252-0010, and the federal rule 40 CFR 93.118.

Appendix C

Exempt Projects Under 40 CFR 93-126 and 93-127

(Text of federal regulations)

RVMPO 2009-2034 Air Quality Conformity Determination March 24, 2009

93.126 Exempt Projects

Notwithstanding the other requirements of this subpart, highway and transit projects of the types listed in table 2 of this section are exempt from the requirement to determine conformity. Such projects may proceed toward implementation even in the absence of a conforming transportation plan and TIP. A particular action of the type listed in table 2 of this section is not exempt if the MPO in consultation with other agencies (see §93.105(c)(1)(iii)), the EPA, and the FHWA (in the case of a highway project) or the FTA (in the case of a transit project) concur that it has potentially adverse emissions impacts for any reason. States and MPOs must ensure that exempt projects do not interfere with TCM implementation. Table 2 follows:

Table 2—Exempt Projects

Safety

- Railroad/highway crossing.
- Projects that correct, improve, or eliminate a hazardous location or feature.
- Safer non-Federal-aid system roads.
- Shoulder improvements.
- Increasing sight distance.
- Highway Safety Improvement Program implementation.
- Traffic control devices and operating assistance other than signalization projects.
- Railroad/highway crossing warning devices.
- Guardrails, median barriers, crash cushions.
- Pavement resurfacing and/or rehabilitation.
- Pavement marking.
- Emergency relief (23 U.S.C. 125).
- Fencing.
- Skid treatments.
- Safety roadside rest areas.
- Adding medians.
- Truck climbing lanes outside the urbanized area.
- Lighting improvements.
- Widening narrow pavements or reconstructing bridges (no additional travel lanes).
- Emergency truck pullovers.
- Mass Transit
- Operating assistance to transit agencies.
- Purchase of support vehicles.
- Rehabilitation of transit vehicles₁.
- Purchase of office, shop, and operating equipment for existing facilities.
- Purchase of operating equipment for vehicles (e.g., radios, fareboxes, lifts, etc.).
- Construction or renovation of power, signal, and communications systems.
- Construction of small passenger shelters and information kiosks.

• Reconstruction or renovation of transit buildings and structures (e.g., rail or bus buildings, storage and maintenance facilities, stations, terminals, and ancillary structures).

• Rehabilitation or reconstruction of track structures, track, and trackbed in existing rights-of-way.

- Purchase of new buses and rail cars to replace existing vehicles or for minor expansions of the fleet₁.
- Construction of new bus or rail storage/maintenance facilities categorically excluded in 23 CFR part 771.

Air Quality

- Continuation of ride-sharing and van-pooling promotion activities at current levels.
- Bicycle and pedestrian facilities.

Other

- Specific activities which do not involve or lead directly to construction, such as:
- Planning and technical studies.
- Grants for training and research programs.
- Planning activities conducted pursuant to titles 23 and 49 U.S.C.
- Federal-aid systems revisions.
- Engineering to assess social, economic, and environmental effects of the proposed action or alternatives to that action.
- Noise attenuation.
- Emergency or hardship advance land acquisitions (23 CFR 710.503).
- Acquisition of scenic easements.
- Plantings, landscaping, etc.
- Sign removal.
- Directional and informational signs.
- Transportation enhancement activities (except rehabilitation and operation of historic transportation buildings, structures, or facilities).
- Repair of damage caused by natural disasters, civil unrest, or terrorist acts, except projects involving substantial functional, locational or capacity changes.

Note: 1 In PM₁₀ and PM2.5nonattainment or maintenance areas, such projects are exempt only if they are in compliance with control measures in the applicable implementation plan.

93.127 Projects Exempt from Regional Emissions Analysis

Notwithstanding the other requirements of this subpart, highway and transit projects of the types listed in Table 3 of this section are exempt from regional emissions analysis requirements. The local effects of these projects with respect to CO concentrations must be considered to determine if a hot-spot analysis is required prior to making a project-level conformity determination. The local effects of projects with respect to PM₁₀ and PM2.5concentrations must be considered and a hot-spot analysis performed prior to making a project-level conformity determination, if a project in Table 3 also meets the criteria in 93.123(b)(1). These projects may then proceed to the project development process even in the absence of a conforming transportation plan and TIP. A particular action of the type listed in Table 3 of this section is not exempt from regional

emissions analysis if the MPO in consultation with other agencies (see 93.105(c)(1)(iii)), the EPA, and the FHWA (in the case of a highway project) or the FTA (in the case of a transit project) concur that it has potential regional impacts for any reason. Table 3 follows:

Table 3—Projects Exempt From Regional Emissions Analyses

- Intersection channelization projects.
- Intersection signalization projects at individual intersections.
- Interchange reconfiguration projects.
- Changes in vertical and horizontal alignment.
- Truck size and weight inspection stations.
- Bus terminals and transfer points.

Appendix D

Description of Public and Agency Participation

Opportunities for Public and Agency Participation

Overview

This section provides additional detail about how both the general public and key agencies participated in the development of this conformity determination, the 2021-2024 Transportation Improvement Program and the amendments to the 2038 Regional Transportation Plan (RTP). It includes Mail Tribune newspaper notices (newspaper of record for Jackson County, Medford, RVMPO and RVCOG) regarding various outreach activities and the legal notice for the public hearing held by the RVMPO Policy Committee on adoption of this conformity determination and the plan and program.

RVMPO Public Participation Plan

The 2007 Public Participation Plan was followed in development of this conformity determination and the corresponding RTP and amended TIP. The Public Participation Plan describes activities and procedures to be followed in the course of developing these documents as well as desired outcomes. The activities described below conducted for this conformity determination are consistent with the Public Participation Plan, which is consistent with 23 CFR 450.316, metropolitan planning, interested parties participation and consultation. Detailed records of all activities described below are maintained in RVCOG offices, 155 N. 1st St., Central Point.

RVMPO Committee Meetings

Throughout development of the 2021-2024 TIPconformity determination, including project selection, three RVMPO standing committees meet regularly in publicly announced meetings. All meeting notices and background material are posted on the web, <u>www.rvmpo.org</u>.

- RVMPO Public Advisory Council met bimonthly, with meetings advertised in the Medford Mail Tribune. Membership is appointed by the RVMPO Policy Committee and includes representation from all RVMPO jurisdictions.
- RVMPO Policy Committee met monthly, with all meetings announced to the news media and to about 100 interested parties. Members are appointed by each RVMPO jurisdiction, including the public transportation provider and ODOT.
- RVMPO Technical Advisory Committee, the standing committee for consultation on air quality under OAR 340-252-0060, met monthly, with all meetings announced to the news media and about 90 interested parties. Membership includes staff from all member jurisdictions and FHWA, Oregon DEQ, ODOT and Department of Land Conservation and Development,

All meeting materials and summary meeting minutes are posted on the RVMPO web site, www.rvmpo.org.

Detailed records of consultation are on file with Rogue Valley Council of Governments, 115 N. First St., Central Point, OR.

Outreach

Outreach on the 2021-24 TIP began in the summer of 2019 when RVMPO member jurisdictions were asked to submit applications for funding utilizing STBG and CMAQ funds. Projects were reviewed and recommended to the RVMPO Policy Committee for inclusion into the 2021-24 TIP. On December 3, 2019 the Policy Committee met and heard presentations on the proposed projects and approved the recommended projects for inclusion into the 2021-24 TIP. Projects selected to receive regional funds in the TIP are evaluated on several factors including impacts on air quality.

All comments received specific to this document are summarized with RVMPO responses in Appendix H.

AQCD Interagency Consultation

Opportunities for agencies to participate in this analysis occurred throughout the development process. Agencies consulted were ODOT, ODEQ, FHWA and FTA. A summary is provided in section 2.1 of the main document. The RVMPO consulted with the Interagency Consultation Group (IACG) and held a conference call with the IACG on the eligibility of specific projects for CMAQ funding and additional discussions (via ZOOM) on the exempt status of projects contained in the draft 2021-24 TIP. Meeting summaries are included below.

Appendix E

Public and Agency Comments Received and Responses During Public Comment Period

Comments Received During Comment Period

The RVMPO held a formal 30-day public comment period August 28, 2020 to September 29, 2020, and a public hearing on September 29, 2020. Activities during the comment period are described in Appendix G. Record of all activities during comment period are on file at RVCOG, Central Point, OR.
